THE FIVE-DAY TEST PREP PROGRAM

5 days before a test, look over all the material – text, lecture notes, handouts – to be covered, and get organized.

* **Isolate** the difficult areas that give you problems.

* **Section** off the remaining material into organized, easy-to-handle amounts.

* **Decide** which study tools you can create to organize and improve your review.
  __ flash cards or master lists __ summary sheets __ time lines
  __ comparison/contrast charts __ diagrams or flow charts __ speed-study diagram
  __ mind maps (visual outlines) __ formal outlines __ mnemonic devices
  __ audio tapes of important concepts  NOTE: color-code ideas to improve recall

* **Choose** which study strategies you can use for improved concentration, comprehension, and recall.
  __ self-test on all chapter highlighting __ self-test on all chapter summaries
  __ answer chapter or study guide questions __ self-test on all lecture notes
  __ rework homework and quiz questions __ memorize in short, intense daily reviews
  __ attend a review session __ predict & answer possible test questions
  __ use all senses to memorize; in each review, see it, say it, hear it, write it
  __ at the end of a page in text or notes, formulate test questions, answer aloud
  __ recite aloud: read a paragraph or page, then look away and explain concepts aloud
  __ take turns with a study partner to test each other on flash cards, etc.

* **Write** out a 5 Day Test Preparation Plan (form on back).

4 days before the test, begin with difficult, problem areas.

* Study intensively – reread a section, combine the information with lecture notes on the topic, and really put your mind to understanding it. It's not enough to recognize material; you need to be able to produce it. Test yourself by reciting information aloud in your own words. Explain concepts, define terms, ask and answer questions.

* If you can't say it, you don't know it! Go back and study it again.

* If you still have problems after this study session, you'll still have time to get help from professor, tutor, or classmate before the test.

3 days before the test, study all the remaining, easier material. Again, use recitation for thorough understanding and retention.

2 days before the test, study all the material thoroughly from beginning to end, as if the test were the next day. Put the most time and effort into studying on this day. Review the parts you know well; put more effort into the difficult areas. To simulate the test, ask yourself possible test questions or have someone else quiz you.

For essay exams, try this step-by-step process:

* Come up with about ten possible essay questions, using your notes and text as sources.

* **Outline** a brief answer to each, covering the key points you would need to make to earn full credit. Use your notes and text as if this were an open-book test.

* Reduce the outlined answer to key words that will trigger your memory. **Memorize** those key words, using mnemonic devices like acronyms, peg words, or loci.

* Even if you don't encounter those exact questions, you will have categorized and **organized** the course content. You will have processed the information in terms of being tested, putting it at your command and better preparing you to answer related questions.

1 day before the test, review briefly and get a good night's sleep! Over the course of five days, you will have studied all of the material three times. Sleep will help you recall and use all that you have learned.
